Updated on January 17, 2022 App Name Goat Simulator Genre Simulation Size 51.58MB Latest Version 2.0.3 Get it On Rating 3.3/5 (16 votes) Download APK (51.58MB) Explore this article Goat Simulator is highly entertaining when this game allows people to do anything, destroy everything they like. Players will enter a world utterly impressive in scale and detail as they spend time exploring in Goat Simulator. You will be a part of this world and be able to do whatever you like. At the same time, you will find various gameplay available and try out the quirky elements you can think of. In addition, the number of characters is also a highlight to attract players into the gameplay. Players will enter a town where many activities take place, from people to environmental factors. But one thing is for sure that you will not come here to reintegrate and build a new life. You will take control of a goat and begin its journey to discover what is inside or is asked to do. At the same time, this is not an ordinary goat with specific skills to facilitate its destructive process against the surrounding elements. Players will start with the level by controlling their goat in the third person and can do whatever they like. Like other simulation games, players still experience a unique manual control method with different control buttons. From there, you will optimize the control of the goat's ability and do whatever weird thing you feel like and necessary. In other words, this is an open world where you won't be bound by anything. As mentioned above, your goat will have specific skills such as jumping, attacking, or clinging to an object. From there, anyone will bring these skills to apply to their surroundings. It is an open world, so some elements in the game will still have specific effects if you damage them. At the same time, to ensure a free and natural user experience, there are many environmental elements you can find in this game. You will see people appear before your eyes or move. You can choose to ignore them and go to new areas to satisfy your curiosity and find exciting elements. Also, since you are a goat, you won't be able to drive the car, but there will be some things that can help you fly high, which as Fireworks. It will be fitted to the back of you if you find it, and you will be in the air for a while and fall on your own. One element that any player will love is that although there are few bleeding effects of the character or the goat itself, although there are attacks. In other words, you are free to sabotage what you see or are curious about without any elements getting in your way. In addition, if you accidentally explode some gas cylinders, you will only fly away from a certain distance. After landing, you can continue to move and repeat the weird sabotage you can think of. In Goat Simulator, players will find two main ways to play: freely experience the open world or complete the tasks in this game. Specifically, for the freedom of experience, players can go where they like and do what they can think of. It can be affirmed that sometimes you will get bored when you repeat the same actions in a specific world. From there, performing the task will help you feel less bored by completing the requirements in the game. The requirements in this game are entirely varied and appear on the upper right side of the screen. So you need to read the request and follow the written request. These requests are as diverse as asking to do a specific action or collect a certain number of items. In addition, each mission has particular challenges as you will need to run around the map to find the required items. Your experience is also changed when you find different types of goats. Besides changing specific gameplay to change the experience, another method is also added to change the character's appearance. Indeed, with the number of characters that you can try, you will like them for various reasons. Specifically, the first reason you need to care is the variety of characters you can reach. They all have different characteristics that you can find in the game. The second reason is that although their names all have the word goat, their appearance will have some changes, such as being more muscular or having the appearance of another animal such as an egg or a giraffe. So this is ultimately appealing to players because now the visuals have changed markedly, and surely each shape has different actions that you will need time to learn. Indeed this is a game that will consume a certain amount of time for players.
